

AGINTIFY

From Chat to Action — Autonomous Agents for Customer Communication and Support

Presented by:

Oleg Chetorean, CEO

info@aichat.md

-

www.aichat.md

Agintify (formerly aichat.md) was born from real pain we faced while working with over 300 businesses as a marketing agency since 2019 and with founders being entrepreneurs themselves.

”

With the rise of LLMs, and being passionate about tech, deep personalization and automations, in 2024 we built aichat.md – our first AI assistant to reply to messages on Facebook, Instagram, websites, and more. Despite operating in a conservative market, the demand quickly exceeded expectations. But we noticed that making the assistant truly autonomous often required time and effort.

We're now shifting toward AI Agents – ones that don't just reply, but think, coordinate with each other, and take full control of conversations, from lead to sale to support, with better accuracy and almost no human effort.

About Us

Problem Statement

”

No Stable or Skilled Team

It's hard to find and keep reliable staff for answering messages. Employees leave often, training takes time, and in many cases, the business owner ends up doing it all – which is not sustainable. Existing chatbots lack full autonomy and accuracy.

90%

immediate response expectation

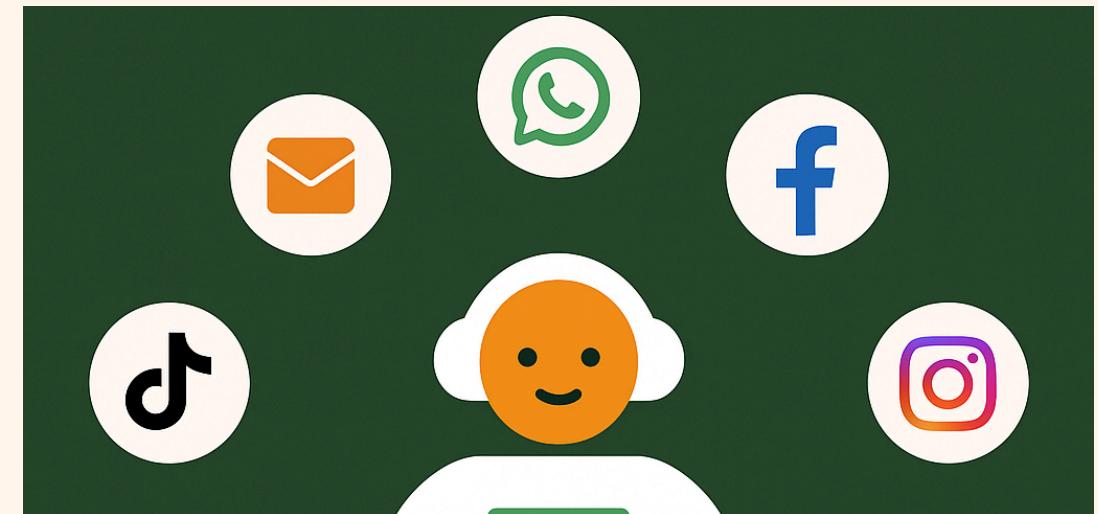

Most businesses reply to messages after 2–3 hours, even though clients expect an answer in 2 minutes. This delay makes clients lose interest or go to a competitor.

Fragmented Communication

Clients contact the business on social, website, email, and messengers. Without a central place to manage all conversations, it's easy to miss replies or forget to follow up.

Solution

Agintify enables SMBs and entrepreneurs to focus entirely on their business by autonomously handling all customer interactions and sales communication with 99% accuracy.

Key benefits include:

Automated Sales & Support Workflows

Autonomously handles end-to-end tasks: Lead qualification · Personalized follow-ups · Re-engagement campaigns · Customer support automation.

Unified Omnichannel AI Assistant

Engages customers across all key channels:
WhatsApp · Tik-Tok · Instagram · Facebook · Telegram · Webchat · Email · SMS

AI That Talks Like a Human

Instead of hiring, training, and managing people, businesses get a tireless AI that handles all customer conversations — instantly and professionally and fully autonomous.

Universal Connectivity

Our proprietary MCP Protocol and flexible API allow seamless connection to any platform to ensure easy Agent Actions and complete knowledge base.

Market Opportunity

The perfect storm: AI costs dropped 99% since 2020, WhatsApp Business hit 200M+ users, 84% of small businesses plan to use AI by 2026, and worker shortages are forcing automation. The result? The AI Agents market explodes from \$7.9 billion today to \$236 billion by 2034 (1800% growth).

Competitive Landscape

Our competitors include:

Askly.me

- Limited Multimodal AI
- Semi-Autonomous (depends on human handoff for complex flow)
- Basic analytics, no smart scoring or follow-ups

Manychat

- Script-based, limited flexibility
- Basic scoring and automation
- No content generation or real-time AI

Chatbase.co

- No voice, image, or smart follow-ups
- Lacks full automation
- No ad or comment AI features

Chatbot.com

- No voice or image support
- No real autonomy (needs external APIs)
- Expensive to scale

Unique Features

Agintify combines autonomous AI agents, smart orchestration, and deep personalization to transform how businesses communicate, sell, and support — across any channel, 24/7.

Multimodal Intelligence

Processes and understands user input across all media types:

Text • Voice Notes • Images • Videos • Files/Documents

AD Context Awareness

Only AI Agent that sees and understands Facebook/Instagram Ads and Comments. 3x higher conversion from social media.

Smart Outbound

Deep Customer research across multiple data, builds a complete profile, and initiates fully personalized conversations across any channel — including SMS and Voice Call.

Agent Orchestration

Multiple agents work together — one acts, another supervises — ensuring smart, self-improving autonomy.

Go-to-Market Strategy

Our platform is already available in 9 languages.

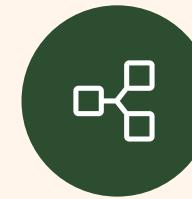

We're starting by building a strong presence in Moldova, Romania, and nearby countries – then expanding across Europe, with global launch planned from 2026.

We plan to acquire customers through:

Digital marketing

campaigns targeting small and medium businesses

Partnerships

with e-commerce platforms, SaaS, HR Companies, CRMs

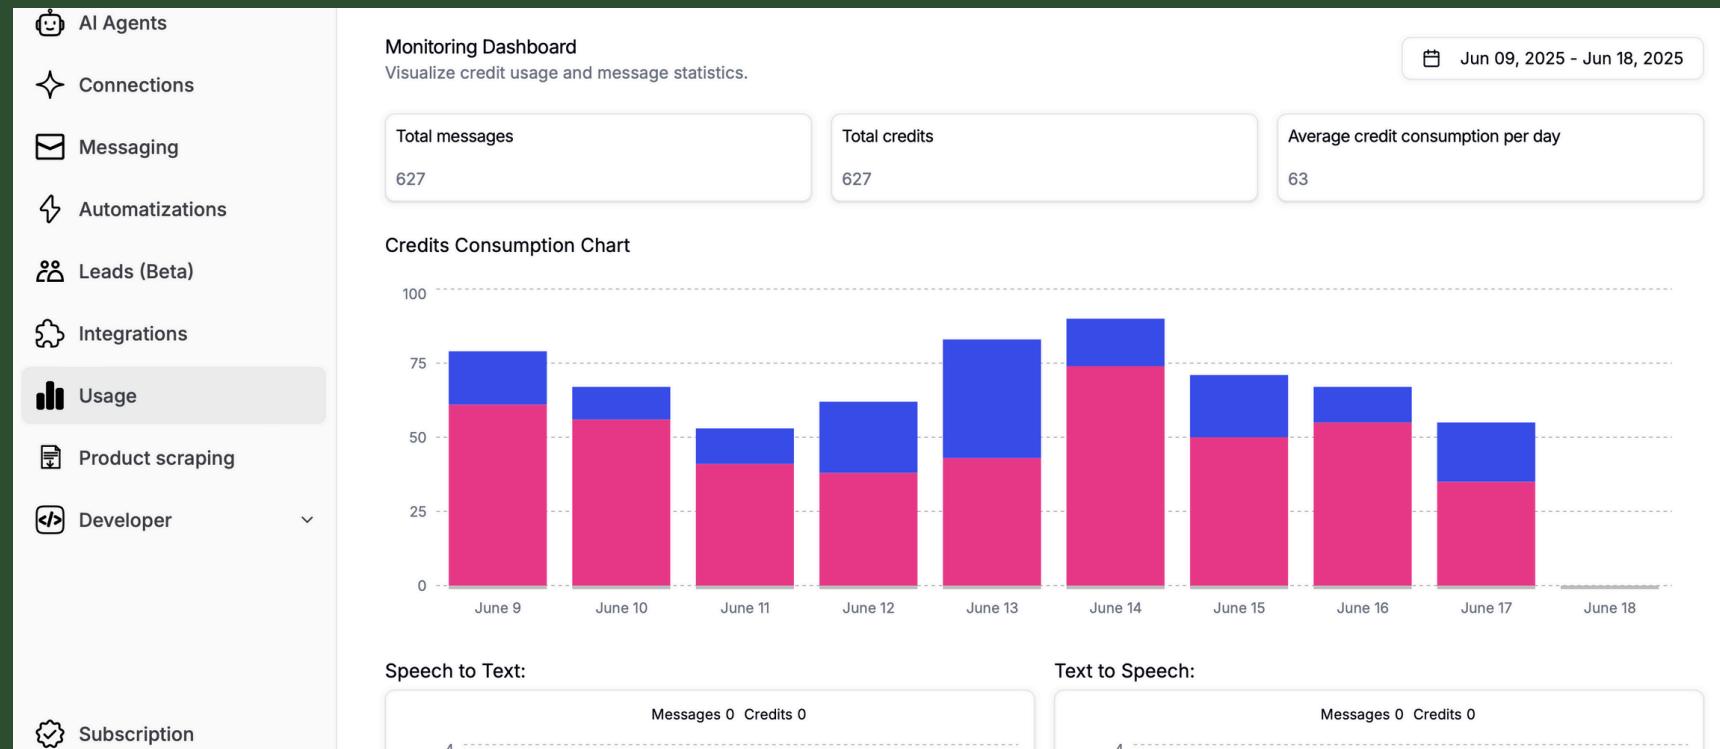

Referrals Network

offering affiliate commissions and engaging local and international business events.

The screenshot shows the aichat AI assistant interface. On the left, there's a sidebar with various options: AI Agents, Connections, Messaging, Automatizations, Leads (Beta), Integrations, Usage, Product scraping, Developer, Subscription, and Settings. The main area displays a conversation with an AI agent named Ana CINEMA, who is associated with social media profiles for Instagram and Facebook. The interface includes sections for System instructions, Images, Models, and Languages. The System instructions section contains a message in Romanian about being persuasive and adapting to users. The Images section says images will be automatically sent to interested customers. The Models section allows selecting suitable AI models for integration. The Languages section lets users choose the languages for responses.

Traction

Since launching in February 2025, Agintify (formerly aichat.md) has onboarded paying clients exclusively through direct outreach and referrals – with zero marketing budget. We've achieved:

- Sub-5% churn rate, showing strong product–market fit
- Rapid growth in lead volume and usage per client
- Clients reporting 50–70% higher conversion rates
- Strong verticals found: E-commerce, Tourism, Dental Clinics

Funding Ask

We are seeking \$70,000 to develop and scale our operations. Funds will be allocated to:

\$30,000

Product development

\$10,000

Hiring key staff

\$30,000

Marketing

Team Overview

OLEG CHETREAN, CEO

Over 10 years experience in working with SMBs to improve operations, boost sales, and using smart tech solutions

LILIA VICOL, CMO

10+ years experience in marketing and sales for E-commerce

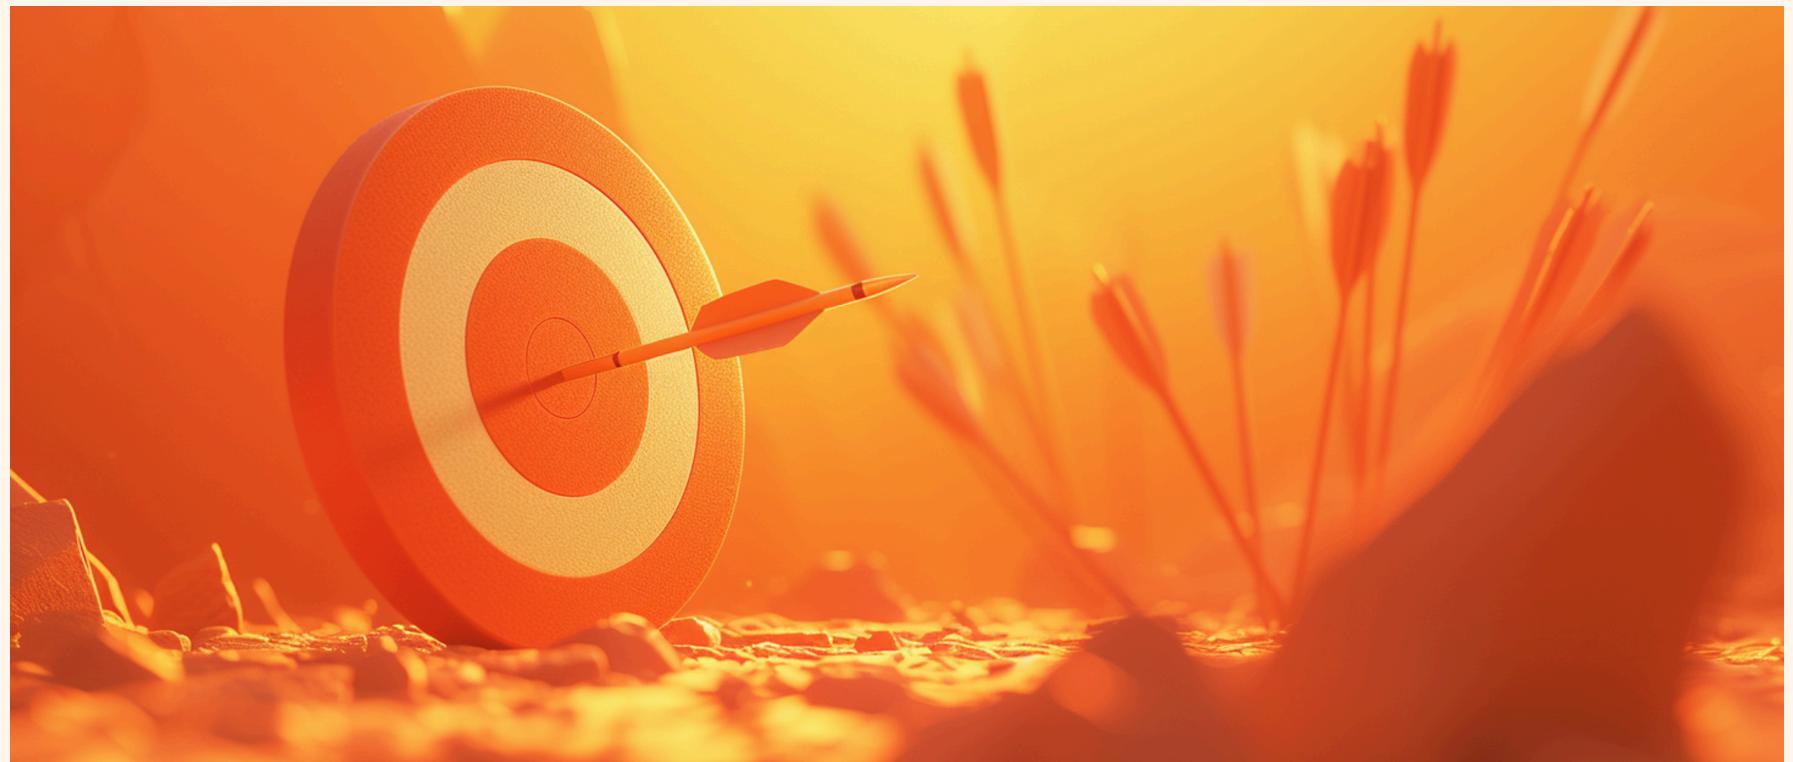

VICTOR FRUNZE, CTO

6+ years experience in programming and building custom software solutions

Exit Strategy

Our exit strategy includes potential acquisition by major players in the AI customer engagement or marketing automation space — such as HubSpot, Intercom, or Tidio.

Our strong presence in Eastern Europe and localized AI agents make us a strategic gateway for global platforms entering this region.

Acquisition Outlook

The AI Agents market is growing 46% year-over-year — and global platforms are actively acquiring startups to accelerate adoption. Agentify's local traction and scalable tech make us a natural acquisition target.

Valuation

Similar companies in our space have been acquired at valuations between \$100M and \$1B, often representing 15x to 60x growth from early-stage funding.

Next Steps

We are building partnerships with key players in the AI Agents industry to increase our value and make us attractive for acquisition.

Milestones

Q3 2026

August 2025

Product Development
Focused on adding more key
Integrations and AI Orchestration

First \$200,000 in Revenue
Demonstrated product-market fit
and effective sales strategies.

Q1 2026

Expand Product Globally
Aiming for expanding Agent
marketplace and revenue growth
through scaling

Customer Testimonials

Our Agents have become already a part of our client's team and they give to Agents real human names, like fully employees

"The agent acts fully autonomously with 99% accuracy and boosted our conversion rate by over 50%. Incredible!"

**Dumitru Toma,
General Manager of CipAuto**

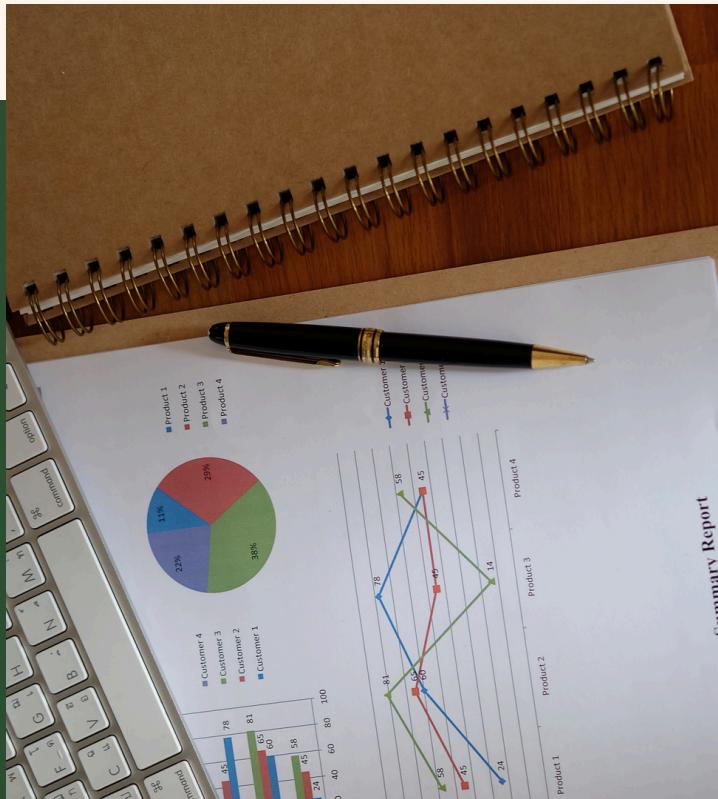

"We can't live without Alex anymore! We went from 70 to 800+ daily leads – and conversions grew by 70%. We're truly amazed! "

**Oleg Rotari,
Founder of Aquadis.**

Risk Analysis

Competition from
Tech Giants

Potential risks include :

Rapid Shifts in AI
Technology

While most players still build simple chatbots, we've already moved into the next wave — AI Agents. This fast-growing market is still wide open, and we have a first-mover advantage. Our agents don't just reply — they act, automate, and solve real problems.

”

Built on the latest AI trends, our platform is flexible, LLM-agnostic, MCP connected and quick to adapt — giving us the edge where big players haven't even entered yet.

“We welcome
your questions
and feedback.”
